

## We provide independent technology comparisons from capture to storage

### WHO WE ARE

Founded in 2018 by carbon capture specialists in Sweden. We have experience from evaluating capture performance for technologies based on Amines, Hot Potassium Carbonate, Chilled Ammonia Process & Oxyfuel.

### WHAT WE DO

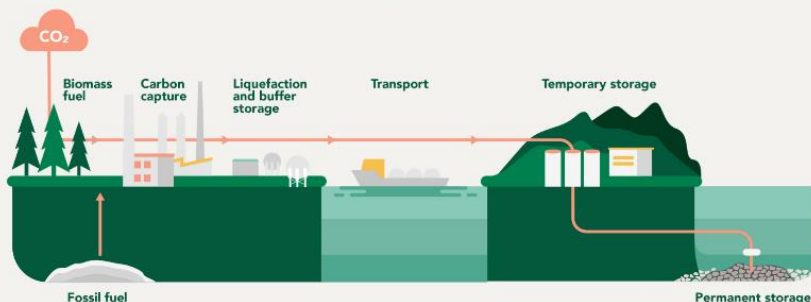

We cover the entire CCUS concept from capture to final storage or utilization.

- Capture technology screening studies
- Pre-feasibility studies
- Logistics studies
- Demonstration units

### HOW WE DO IT

We have completed more than 20 CCUS studies and several test campaigns at pilot scale involving:

- Heat and mass balance calculations
- OPEX, Investment cost and total cost per ton CO<sub>2</sub>
- Demonstration unit design & operations
